DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instantly claimed epoxy acrylates, compositions and uses thereof are neither disclosed nor fairly suggested by the closest prior art: Müller et al (US 5277,739 01-1994). Müller teaches (Columns 7 and 8, line 6, center and column 11, line 6-column 18, line 4) bis-acrylate monomers containing either the bis(4-oxy-cylcohexyl)methyl or tricyclodecyl cores as contained in the instant compounds of formulas (A) and (B). Müller further teaches (Column 23, line 31- column 24, line 19) the use of these compounds in dental adhesive compositions. The bis(4-oxy-cylcohexyl)methyl core taught by Müller, however, differs from that instantly claimed in being dimethyl-substituted on the central methylene. The tricyclodecyl cores taught by Müller are differently substituted than those instantly claimed as well. Müller, therefore, neither discloses nor fairly suggests the manufacture or use of the specific compounds instantly claimed. One of ordinary skill in the art would therefore not have been motivated to modify the compounds and/or compositions of Müller to produce those instantly claimed. The instantly claimed epoxy acrylates, compositions and uses thereof are therefore patentable over the teachings of Müller, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
